

All the teachers and staff are really supportive!

I love doing food tech! It's really fun, and later, you can eat what you've made in the lesson! It's also helpful to learn how to cook for when you are older and it can be a hobby too!

Teachers are nice and the opportunities are really good (eg football, basketball, netball teams and other after school clubs as well as going to see national events).

Don't worry. The teachers are nice and you won't get lost. I found my way around school in 2 days. If you need help, just ask the teachers.

At first high school feels a bit scary but if you are polite, respectful and listen things go well.

*If you have questions, ASK SOMEONE!
Don't bottle it up.*

High School is not as bad as you think. All the teachers are really supportive and you can tell them anything. The lessons are really fun and engaging and the extra-curricular activities are very fun.

Year 6 and 7 have lots in common, so don't worry about starting secondary school and remember -- DELAPSUS RESURGAM -- when I fall, I shall rise.

Here is what some of our current students wanted to share about their first year at North Cestrian.

The teachers are really friendly and understanding.

School may feel big and scary at first but you soon find your way around and make amazing friendships.

The food in the canteen is really igreat!

Even though I only knew one person before starting North Cestrian, I have made new friends

It's exciting having Science rooms and using the equipment.

Year seven is just like year six, but with kinder teachers and a few more rules in the mix.

Year 7 is nothing to be scared about! Although it has more rules, the time flies by and you will settle in no time. It gets easier along the way and you will make lots of friends too. Enjoy year 6 but look forward to coming to year 7. 😊
